

FLARE

The background is a dark, almost black, space filled with numerous vertical, slightly blurred light streaks in shades of white and light blue. These streaks create a sense of depth and movement. In the lower-left quadrant, there are several sets of parallel diagonal lines that recede into the distance, creating a perspective effect. These lines are also slightly blurred and have a soft, glowing quality, similar to the vertical streaks but angled differently.

Simple, but not simplistic

TRIMLESS SPOTLIGHT

White ●

Recessed square fix trimless luminaire LED COB spotlight with contact frame for decorative application. LED is set back to minimize glare with main body and heat sink in die-cast and extruded aluminum and passive dissipation system. In addition to torsion springs. Safety glass included quick and easy toll free assembly. Specific light emission with three different beam angles. External driver including cable connected with driver. Option to apply DALI / 1-10 V / Trailing Edge dimmable. IP20.

LED STRIPS

LED flexible strip light made of high quality FPC board on a 24V DC flexible white circuit which comes in 10mm and 12mm width to apply more heat release. The product is supplied in 5 and 10 meter coils. Supplied with connection cable on both sides for connections in line or power supply. The back of the circuit is provided with adhesive tape for quick application. The strips can be cut at predefined distance depending of the strip type - opening angle 120°, IP20 and IP66.

LED flexible strip light made of high quality FPC board on a 24V DC flexible white circuit which comes in 10mm and 12mm width to apply more heat release. The product is supplied in 5 and 10 meter coils. Supplied with connection cable on both sides for connections in line or power supply. The back of the circuit is provided with adhesive tape for quick application. The strips can be cut at predefined distance depending of the strip type - opening angle 120°, IP20 and IP66.

STRIP LIGHTS & PROFILES

LED flexible strip light made of high quality FPC board on a 24V DC flexible white circuit which comes in 10mm and 12mm width to apply more heat release. The product is supplied in 5 and 10 meter coils. Supplied with connection cable on both sides for connections in line or power supply. The back of the circuit is provided with adhesive tape for quick application. The strips can be cut at predefined distance depending of the strip type - opening angle 120°, IP20 and IP66.

SMD	24V	IP20/ IP66	50,000h	DALI	I/I0V	PUSH	120°
-----	-----	---------------	---------	------	-------	------	------

	W	K	Lumen	L/W	CRI
FL2216.300.24.27	24	2700K	1790	74.6	≥90
FL2216.300.24.3		3000K	1880	78.3	≥90
FL2216.300.24.4		4000K	1920	80	≥90
FL2216.300.24.5		5000K	1920	80	≥90

Made of high quality silicon & FPC board. Uniform light & dot free. Slight bending. Can be installed with mounting clip or aluminum channel. Three different power feeding direction, to fit different installation request (End feed / Side feed / Rear feed)
